

# Oracle® CorporateTime for Windows

## Release Notes

Release 6.0.3

August, 2002

Part No. B10152-01

This document summarizes the differences between Oracle CorporateTime for Windows 6.0.3 and its documented functionality. For the most recent and up-to-date information on this product, consult the *Oracle Collaboration Suite Release Notes Addendum*, available online at <http://otn.oracle.com>.

## 1 Certification and System Requirements

- n RAM: 16 MB minimum
- n 8 MB hard disk space
- n Supported platforms: Windows 98, ME, NT, 2000 and XP. If you are installing Oracle CorporateTime on an NT machine, it must have Service Pack 6 or later installed.
- n Calendar Server: Oracle Calendar server 5.5 (included with Oracle Collaboration Suite)

## 2 General Issues and Workarounds

This section describes general issues and their workarounds for Oracle CorporateTime 6.0.3 for Windows.

### 2.1 In-tray on startup

If you have decided to have your In-tray closed on startup, the New Entry icon will not appear when you have new entries. Suggested workaround: Select Refresh All from the View menu.

**ORACLE®**

Oracle is a registered trademark of Oracle Corporation. Other names may be trademarks of their respective owners.

Copyright © 1993, 2002 Oracle Corporation. All Rights Reserved.

## **2.2 Agenda preferences**

If you modify your agenda preferences while you are on-line, the Display Hours and Start Week preferences will not be saved when you go off-line

## **2.3 Different Local Storage**

If a user logs out while working off-line and a second user logs in, decides to work off-line and selects Cancel on the Different Local Storage dialog box, Oracle CorporateTime 6.0.3 for Windows will close. Suggested workaround: Do not click Cancel in the Different Local Storage dialog box, but select a location for your off-line Agenda instead.

## **2.4 Reminders**

If you set your Meeting default Reminders to 15 minutes and your Daily Note and Day Event Reminders are off, and another user invites you to a Daily Note or Day Event, the 15-minute Reminder will be enabled for that Daily Note or Day Event.

## **2.5 Resources' designate rights**

An error will occur if you create a resource and attempt to use your designate rights to change the attendance status from Will confirm later to Will attend or Will not attend.

## **2.6 Conflict checking**

Conflict checking is no longer done automatically. If you would like to check for conflicts when you create a repeating Meeting, you must click the Check Conflicts button.

# **3 Configuration Issues and Workarounds**

This section describes configuration issues and their workarounds for Oracle CorporateTime 6.0.3 for Windows.

## **3.1 Installation**

In certain cases, you may not be able to install Oracle CorporateTime 6.0.3 for Windows on a machine using Windows 2000.

## **3.2 On-line and off-line time zones**

If you change from one time zone to another and then switch to off-line mode, your on-line and off-line time zones will not be synchronized.

### **3.3 Connection Editor's server field**

The server field in the Connection Editor has a 64-character limit.

### **3.4 Virtual host sign-in**

Virtual host sign-in is not supported.

### **3.5 Synchronizing with CorporateSync 2.x or lower**

When running CorporateSync 2.x or lower with this product, it will be unable to synchronize with your off-line Agenda or your Address Book. Suggested workaround: Upgrade to a later version of CorporateSync.

### **3.6 Synchronizing on-line and off-line Agendas**

If you delete your off-line files and then synchronize your on-line and off-line Agendas, the Personal tab and Custom date field will not be updated. An Oracle Calendar server 5.5 is required for this information to be updated during synchronization.

### **3.7 Rebooting after installation**

After installing Oracle CorporateTime 6.0.3 for Windows for the first time, you may be prompted to reboot your machine. This should be done right away, if possible.

## **4 Administration Issues and Workarounds**

This section describes administration issues and their workarounds for Oracle CorporateTime 6.0.3 for Windows.

### **4.1 SIGNON recorded twice**

SIGNON is recorded twice in the `/users/unison/log/act.log` when `[ENG] activity = TRUE` in the `users/unison/misc/unison.ini` file on the server.

### **4.2 Reinstalling an older version**

Once you have installed Oracle CorporateTime 6.0.3 for Windows, you will not be able to reinstall an older version.
